

# SHAORU CHEN

Microsoft Research, NYC

(732)-784-0525 ◇ shaoruchen@microsoft.com ◇ www.shaoru.site

## RESEARCH OVERVIEW

---

My research lies in machine learning, control, and optimization. I have been working toward making AI-enabled autonomous systems work safely and reliably in the real world. My works span safe and reliable AI, robust model predictive control, and safe control of learning-enabled systems.

## EDUCATION

---

**University of Pennsylvania**

*Philadelphia, PA*

**Ph.D. in Electrical and Systems Engineering**

*Aug. 2017 - Dec. 2022*

Advised by: Prof. Victor M. Preciado

Research interests: control, optimization, machine learning. GPA: 3.96/4.00.

**Zhejiang University**

*Hangzhou, China*

**B.E. in Electrical Engineering**

*Aug. 2013 - Jun. 2017*

Chu Kochen Honors College, Advisor: Prof. Jian Chen. GPA 90.8/100

## EXPERIENCE

---

**Microsoft Research, NYC**

*Jan. 2023 - Present*

*Postdoctoral Researcher*

*New York City, NY*

- Safety-assured control of neural network systems through online convex optimization.
  - Filtered unsafe control inputs for neural network systems using neural network verification bounds and robust model predictive control.
  - Relaxed the complex, nonconvex predictive control problem of neural network systems into a convex quadratic program with interpretable numerical results.
- Discovering planable continuous latent states from high-dimensional observations.
  - Learned a latent space representation to capture the dynamics of an agent from image observations while discarding the exogenous noises and maintaining the local neighborhood structure.
  - Designed a hierarchical motion planning method in the latent space utilizing the high-level abstractions of the latent states and the low-level latent dynamics.
- Verification-aided learning for safe policies with convergence guarantees.
  - Designed a fine-tuning method based on convex optimization for learning neural network certificate functions with formal guarantees.
  - Utilized cutting-plane methods to provide finite-step termination guarantees for the fine-tuning iteration which boosted the learning success rate.

**University of Pennsylvania**

*Aug. 2017 - Dec. 2022*

*Graduate Research Assistant*

*Philadelphia, PA*

- Scalable neural network verification through operator splitting.
  - Proposed DeepSplit, a neural network verification algorithm that is scalable, modular, amenable for GPU acceleration, and enjoys fast theoretical convergence guarantees.

- Demonstrated the acceleration of the proposed method on certifying robustness of deep neural network image classifiers and deep Q-network in reinforcement learning tasks.
- Boosting tightness of robust model predictive control.
  - Proposed a novel robust MPC method that jointly searches for robust state-feedback controllers and uncertainty over-approximations through a convex quadratic program.
  - Demonstrated that the proposed method consistently and significantly outperforms existing robust MPC approaches through comprehensive comparison.
- Certificate function synthesis for hybrid systems with convergence guarantees.
  - Proposed a counterexample-guided Lyapunov function synthesis algorithm for linear hybrid systems with finite-step termination guarantees.
  - Applied the proposed method to approximate the region of attraction of NN-controlled systems.
- Differentiable safe controller design through control barrier functions.
  - Proposed a differentiable safety layer using control barrier functions and a set-theoretic parameterization to construct a safe-by-construction NN controller.
  - Demonstrated that the proposed safety layer enjoys improved training and evaluation efficiency compared with the projection-based safety layers.

#### Harvard University

*Research Intern*

Nov. 2016 - May 2017

*Cambridge, MA*

- Brain-network reconstruction using molecular imaging. Mentor: Prof. Quanzheng Li.
  - Applied graph theory and machine learning to integrate the analysis of different types of brain molecular images for brain-network reconstruction and diagnosis of Alzheimer's disease.

#### University of California, Davis

*Research Intern*

Jul. 2016 - Sept. 2016

*Davis, CA*

- Fault-tolerant control of distributed energy resources. Mentor: Prof. Nael El-Farra.
  - Developed sensor fault accommodation methods for control systems subject to improper sensor reading and sensor sampling rate drift.
  - Examined stability and performance of a multi-rate sampled-data solid oxide fuel cell system.

## HONORS AND AWARDS

---

Chu Kochen Honors College Research Fellowship, Zhejiang University	2017
Chunhui Scholarship (highest honor in College of Control Science and Engineering, ZJU)	2017
First-Class Scholarship for Outstanding Students of Zhejiang University (top 3%)	2014, 2015
Outstanding Student Leader Awards, Zhejiang University	2014
First Prize of Chinese Physics Olympiad (Top 55 in Jiangsu Province, China)	2012

## INVITED TALKS

- 
- Learning Lyapunov Functions for Hybrid Systems  
 - Spotlight talk in the 55th Annual Conference on Information Sciences and Systems (CISS), 2021.

## PROFESSIONAL SERVICE

---

**Journal Reviewer** IEEE Transactions on Automatic Control (TAC), Automatica, IEEE Open Journal of Control Systems (OJCSYS), IEEE Control Systems Letters (L-CSS), IEEE Transactions on Vehicular Technology (TVT).

**Conference Reviewer** IEEE Conference on Decision and Control (CDC), IEEE International Conference on Robotics and Automation (ICRA), American Control Conference (ACC), IFAC World Congress, Annual Learning for Dynamics and Control Conference (L4DC), ACM International Conference on Hybrid Systems: Computation and Control (HSCC), IFAC Symposium on System Identification (SYSID).

## TEACHING EXPERIENCE

---

Graduate Teaching Assistant at the University of Pennsylvania	Philadelphia, PA
- ESE 618-001 Learning for Dynamics and Control	Fall 2021
- ESE 619 Model Predictive control	Spring 2021
- ESE 605 Modern Convex Optimization	Spring 2020
- ESE 504 Introduction to Optimization Theory	Fall 2018

## TECHNICAL SKILLS

---

<b>Programming Languages</b>	Python, Matlab, C
<b>Tools</b>	PyTorch, Gurobi, Yalmip, CVX, MPT, $\text{\LaTeX}$
